What happened if I deactivate the plugin or delete the plugin?

How does the barcode letter-size plugin works?

The purpose of the Barcode Letter-Size plugin is to create barcode(s) to identify/match your products. So when you do your inventory, you can check to see how many products you have in stock on the website and compare what you actually have in your storage or warehouse. This will help you keep track the actual number of products you have in stock and then you will update the actual numbers on the website.

Most likely you have to create an excel sheet that has your products, sku, prices and the number in stock so you can keep track monthly.

All 3 sections (Title & Sku, Title and Sku) function the same.

Underneath “Create Barcode”, there are 3 options for creating the barcode with:

- Title & Sku
- Title
- Sku

There are six codetypes (barcode designs), examples on the bottom starting from left to right in order starting with:

- code128a
- code128b
- code128c
- code39
- code25
- codabar

This is how it looks overall (18 barcode designs total):

The Barcode Letter-Size plugin can display 48 barcode(s) per print page.

There is 48 products total on the demo (you might have more than 48 products) and for this example I have 48 products and convert it into 48 barcode(s) to be print out.

1) Select one codetype: code128a, code128b, code128c, code25, code39, codabar.

2) Slide the length of numbers of your choice for the 'Title' that you want to display on the barcode.

There are 2 buttons: 'Generate' button will display the barcodes and 'Reset' button will reset the settings.

Now click 'Generate' button.

After you click ‘Generate’ button, it will go to the next page that display all the barcode(s) with your setting which is called ‘Display Title &Sku’:

Print Out

Remove

☐ Select All Checkboxes

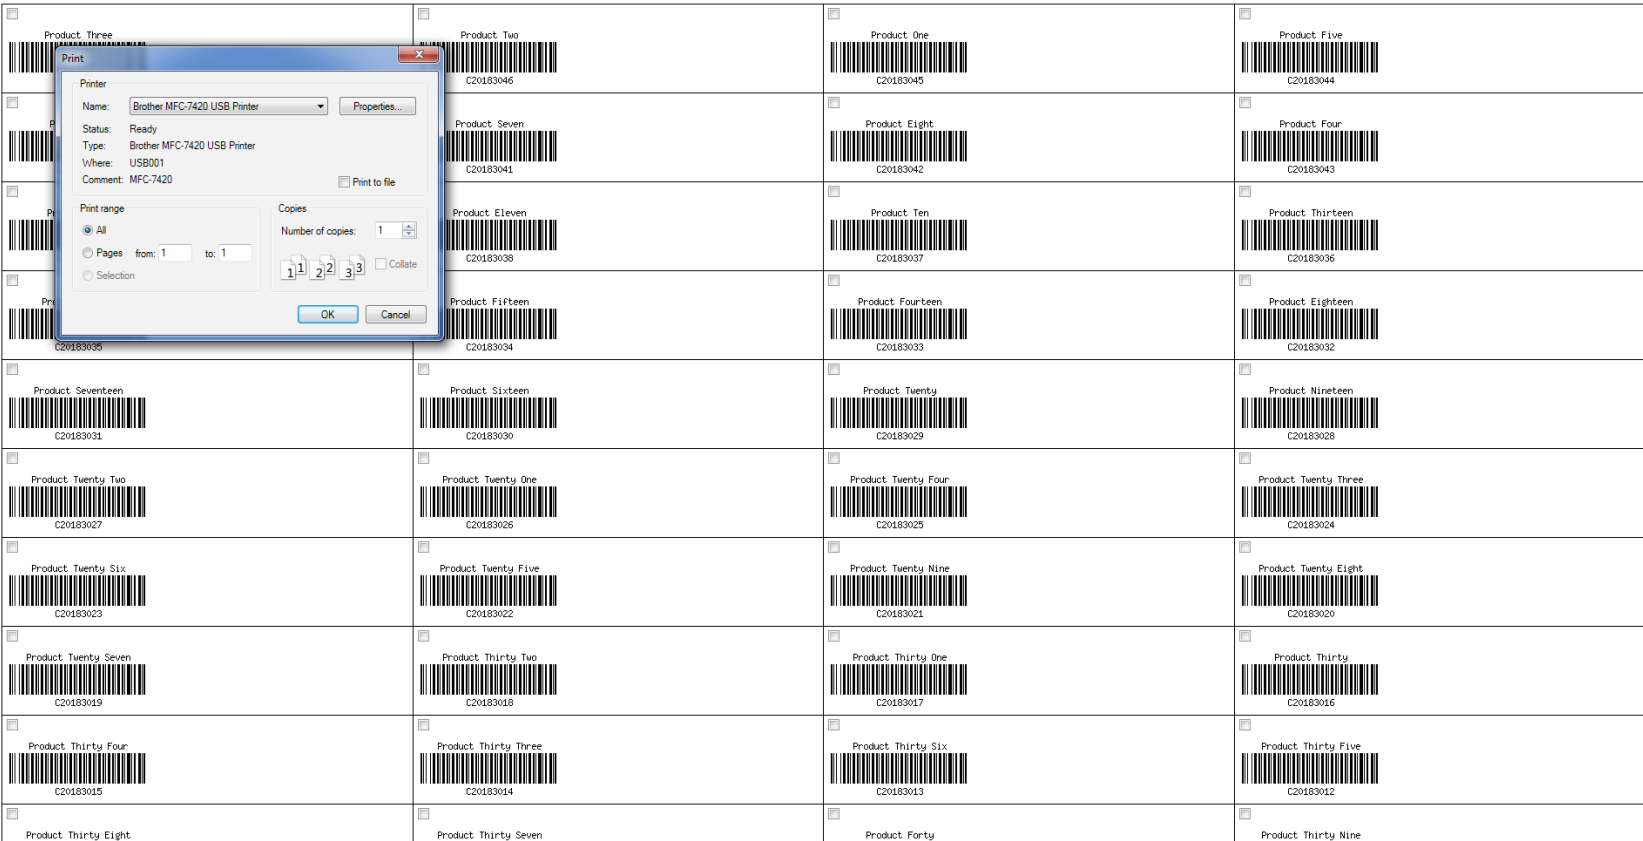

Thank you for creating with WordPress

Version 4.8

There are 2 buttons:

The ‘Print’ button will print out the barcode(s)

The ‘Remove’ button will remove either 1 barcode or more or all of the barcode(s) from the table from the database.

When you click on the ‘Print’ Button, the print prompt will appear.

This is where you print out the barcode(s) from your printer.

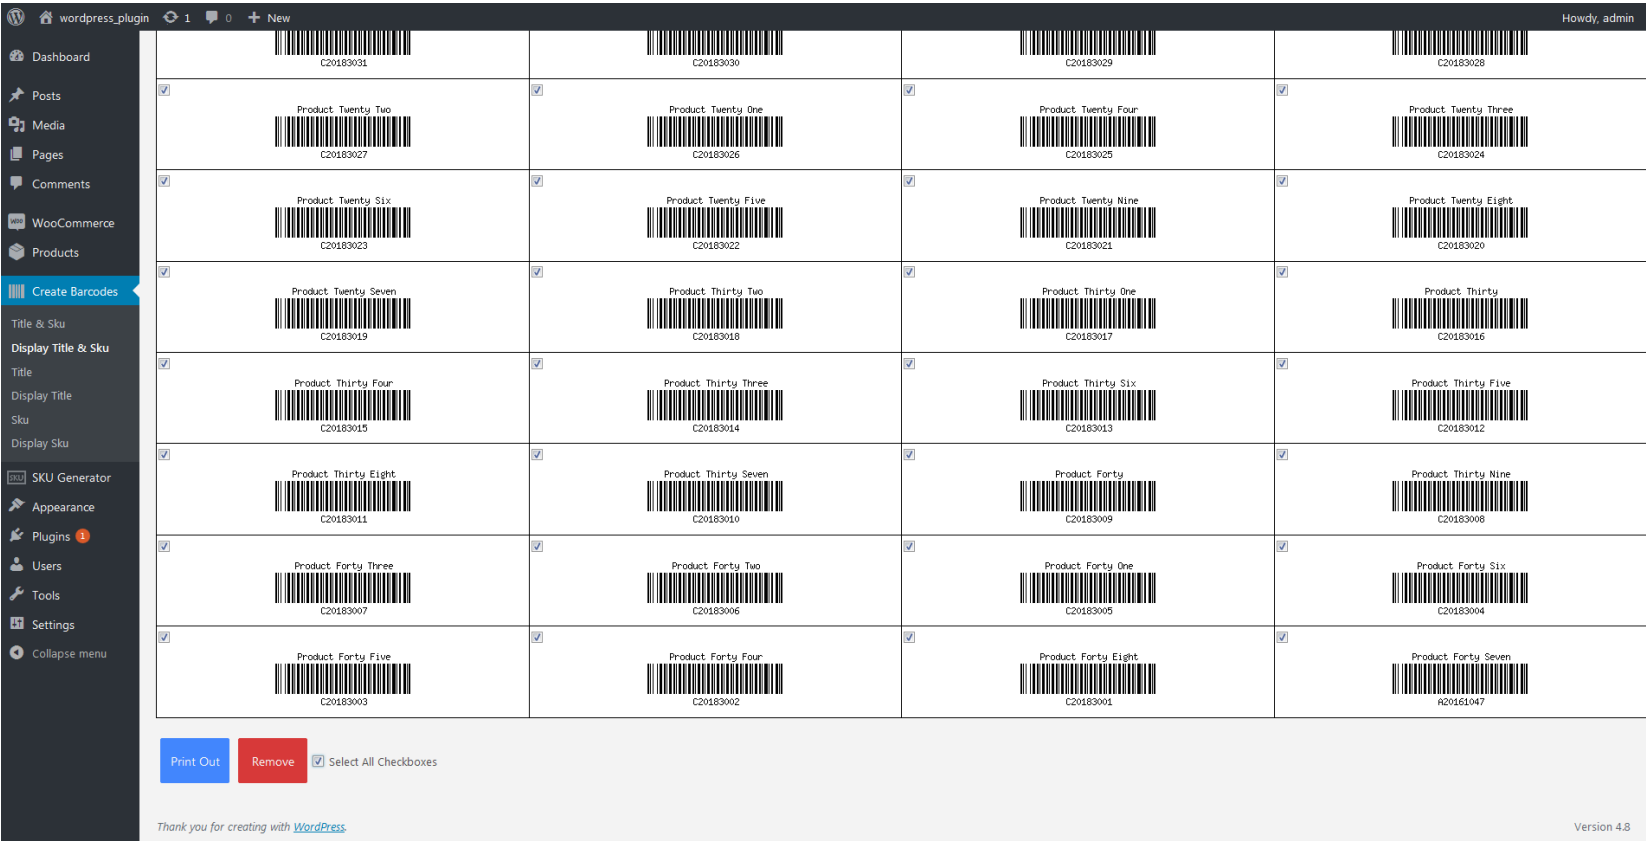

You can select all pages or select the pages of barcode(s) that you want to print out.

You can print out 48 barcode(s) for each page.

Each page(s) would look like the image on the right once you print it out:

You will also notice the small checkbox on top corner of each images.

<div>Product Nineteen</div> <div></div> <div>C20183028</div>	<div>Product Twenty</div> <div></div> <div>C20183029</div>	<div>Product Sixteen</div> <div></div> <div>C20183030</div>	<div>Product Seventeen</div> <div></div> <div>C20183031</div>
<div>Product Eighteen</div> <div></div> <div>C20183032</div>	<div>Product Fourteen</div> <div></div> <div>C20183033</div>	<div>Product Fifteen</div> <div></div> <div>C20183034</div>	<div>Product Twelve</div> <div></div> <div>C20183035</div>
<div>Product Thirteen</div> <div></div> <div>C20183036</div>	<div>Product Ten</div> <div></div> <div>C20183037</div>	<div>Product Eleven</div> <div></div> <div>C20183038</div>	<div>Product Nine</div> <div></div> <div>C20183039</div>
<div>Product Six</div> <div></div> <div>C20183040</div>	<div>Product Seven</div> <div></div> <div>C20183041</div>	<div>Product Eight</div> <div></div> <div>C20183042</div>	<div>Product Four</div> <div></div> <div>C20183043</div>
<div>Product Five</div> <div></div> <div>C20183044</div>	<div>Product One</div> <div></div> <div>C20183045</div>	<div>Product Two</div> <div></div> <div>C20183046</div>	<div>Product Three</div> <div></div> <div>C20183047</div>

There is also a checkbox on top of each barcode(s) images which you can check the ones you want to keep and delete the ones you don't need.

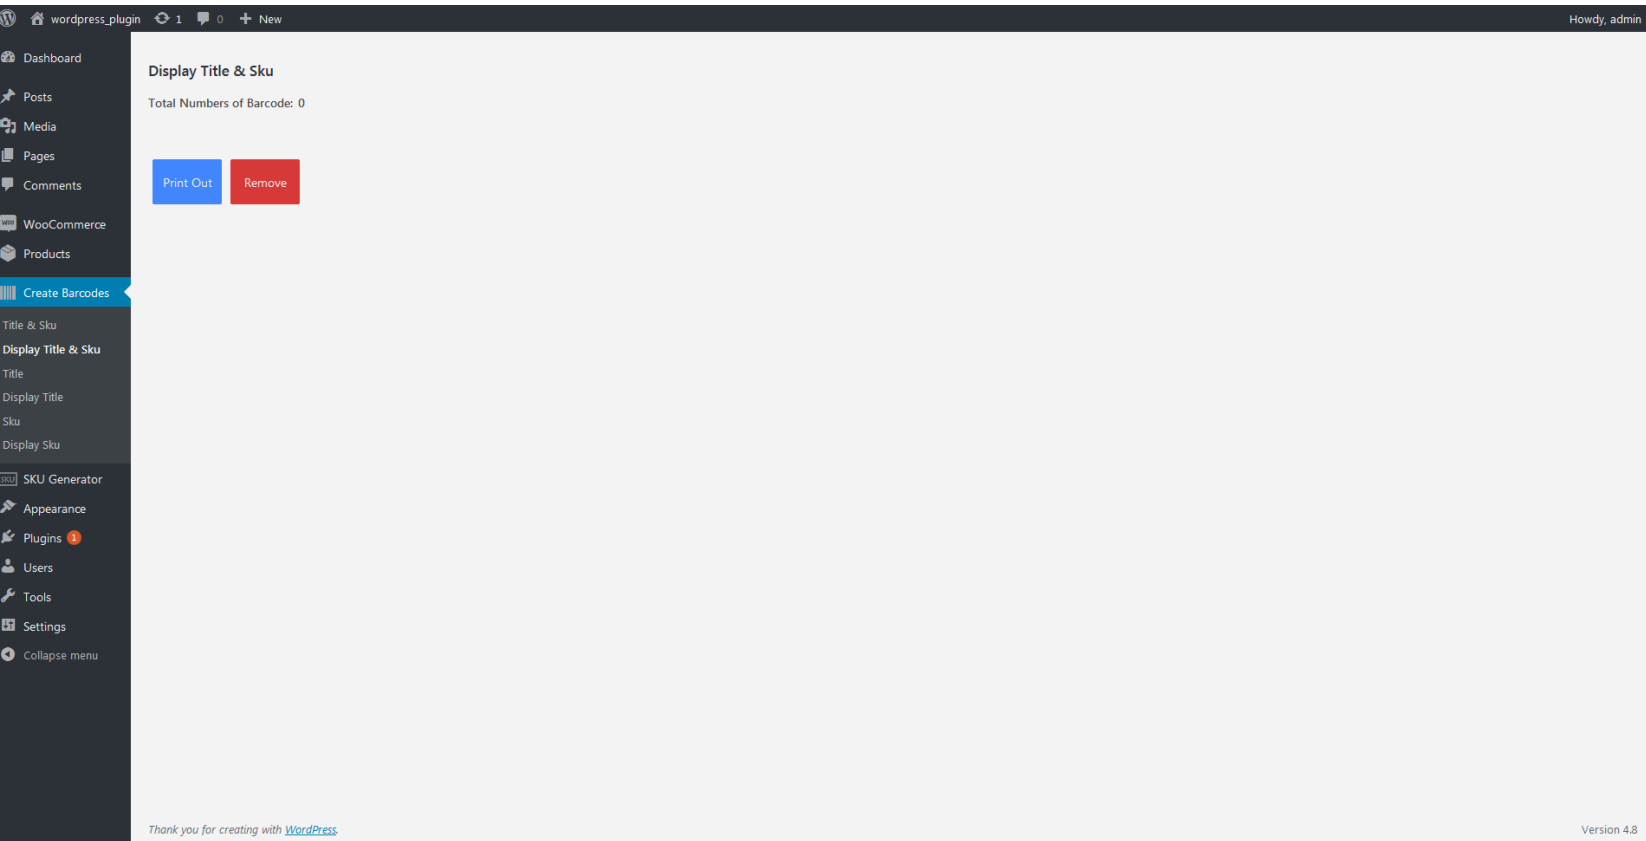

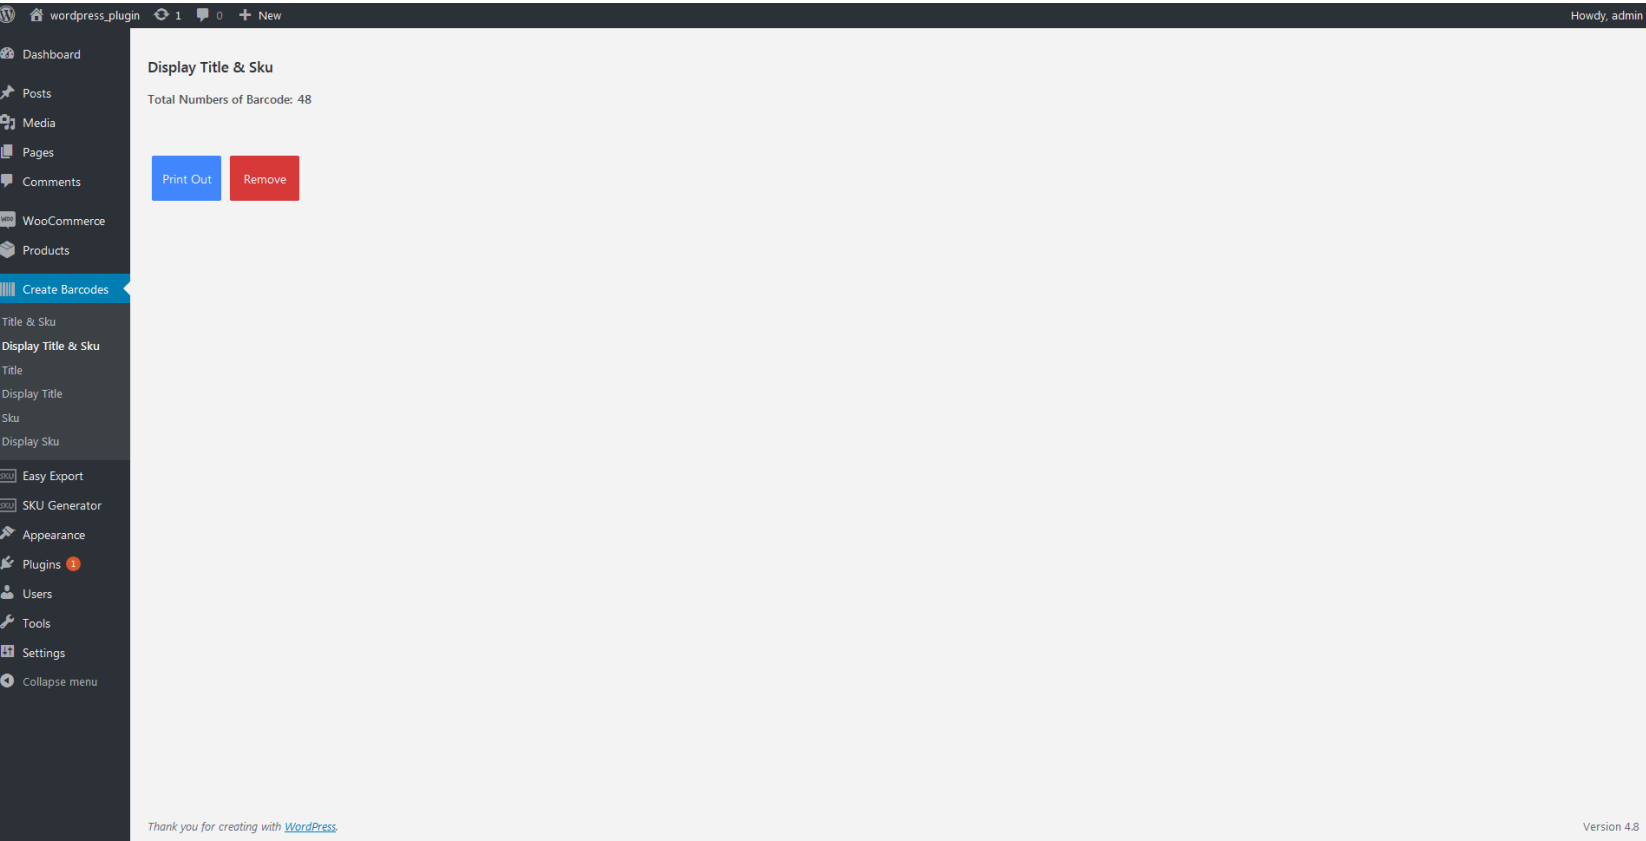

The 'Select All Checkboxes' will select all of the checkboxes and delete the barcode(s) once you click on the 'Remove' button.

This will not affect the products that you have on the website because the barcode(s) are store in another table from the database.

Once you click 'Remove' Button, it will remove the barcode(s) and the 'Total Numbers of Barcode: 48' will still appear.

You have to click refresh the page and the 'Total Numbers of Barcode: 48' will appear '0'.

I recommended that you delete the barcode(s) once you print the ones you wanted so you save space on your website.

What labels are used to print out the barcodes?

The barcode lettersize plugin used Full-Sheet Labels (the size of a letter 8-1/2" x 11") to print out the barcode(s) and you can used a scissor to cut the barcode(s) individually and then you place the barcode(s) label on the boxes.

You can also used a letter size paper to print out the barcode and cut the barcode(s) individually and used tape to put the barcode(s) labels on the boxes.

These are some of the companies that sell those Full-Sheet Labels:

Uline

<https://www.uline.com/>

Staples

<http://www.staples.com/>

Office Depot

<http://www.officedepot.com/>

Quill

<http://www.quill.com/>

There are some other companies that sell it too, I just name common stores that sell Full-Sheet Labels.

What happened if I deactivate the plugin or delete the plugin?

If you deactivate the plugin it will stay on the plugin page and the Bar tables will be still on wordpress database.
But if you delete/remove the plugin it will delete the folders, files and also the tables from the wordpress database.
