What happened if I deactivate the plugin or delete the plugin?

How does the barcode letter-size plugin works?

The purpose of the **Barcode Letter-Size plugin** is to create barcode(s) to identify/match your products.

The **Barcode Letter-Size plugin** can display **32** barcode(s) on **Firefox, Chrome, Opera** and **Mircosoft Edge** per page.

The size image is 1 for barcodes and the size image is 5 for QR barcodes

When you scan the barcode(s) (**10** designs), the SKU will appear and the product name will display (not part of the scan)

Select 1 Barcode For All Products

Total Numbers of Products: 100

Select a category: *

Select a codetype: *

Select a number size for the barcode image: *

GenerateReset

There are **10** codetypes (barcode designs), examples on the bottom starting from left to right in order starting with:

- 1. upc-a
- 2. ean-13
- 3. ean-8
- 4. code-39
- 5. code-93
- 6. ean-128
- 7. code-128
- 8. itf
- 9. qr
- 10. dmtx

These are the 10 barcode designs:

▼

Generate

Reset

Select the category to generate the barcode.

Select one codetype: upc-a, ean-13, ean-8, code-39, code-93, ean-128, code-128, itf, qr, dmtx

Select a number size for the barcode image: 1 to 5.

By default the size image is 1 for barcodes and the size image is 5 for QR barcodes.

You can increase / scale the image size for your preference.

There are 2 buttons:

Generate button will create the barcodes.

Reset button will reset the settings.

Now click **Generate** button.

After you click **Generate** button, it will go to the next page which called **Display Barcode** page where all the barcodes appears:

Display Barcode:

Print Preview

Remove

☐ Select All Checkboxes

When you click on the **Print Preview** button, a pop up window will appear with all the barcodes on it.

When you click on the **Remove** button will remove either 1 barcode or more or all of the barcode(s) from the table from the database.

You can print out **32** barcode(s) on **Firefox, Chrome, Opera** and **Mircosoft Edge** per page.

The default size image is **1** for barcodes and the default size image is **5** for QR barcodes

Click on the **Print Preview** button, a pop up window displays the barcodes.

For **Chrome & Opera & Edge** users press on **Ctrl + P** (After you click on the **Print Preview** button).

For **Firefox** users just click on  - **Open Menu** and select **Print**.

For all 4 browsers, you have to set **Print Setttings**:

Layout: Portrait / Landscape

Paper size: Letter

Margins (inches): 0.0 (all)

Header/Footer: --blank-- (all)

Scale: Depending on your printer, you can adjust it to fit 32 barcodes on paper sheet

Firefox: 82%

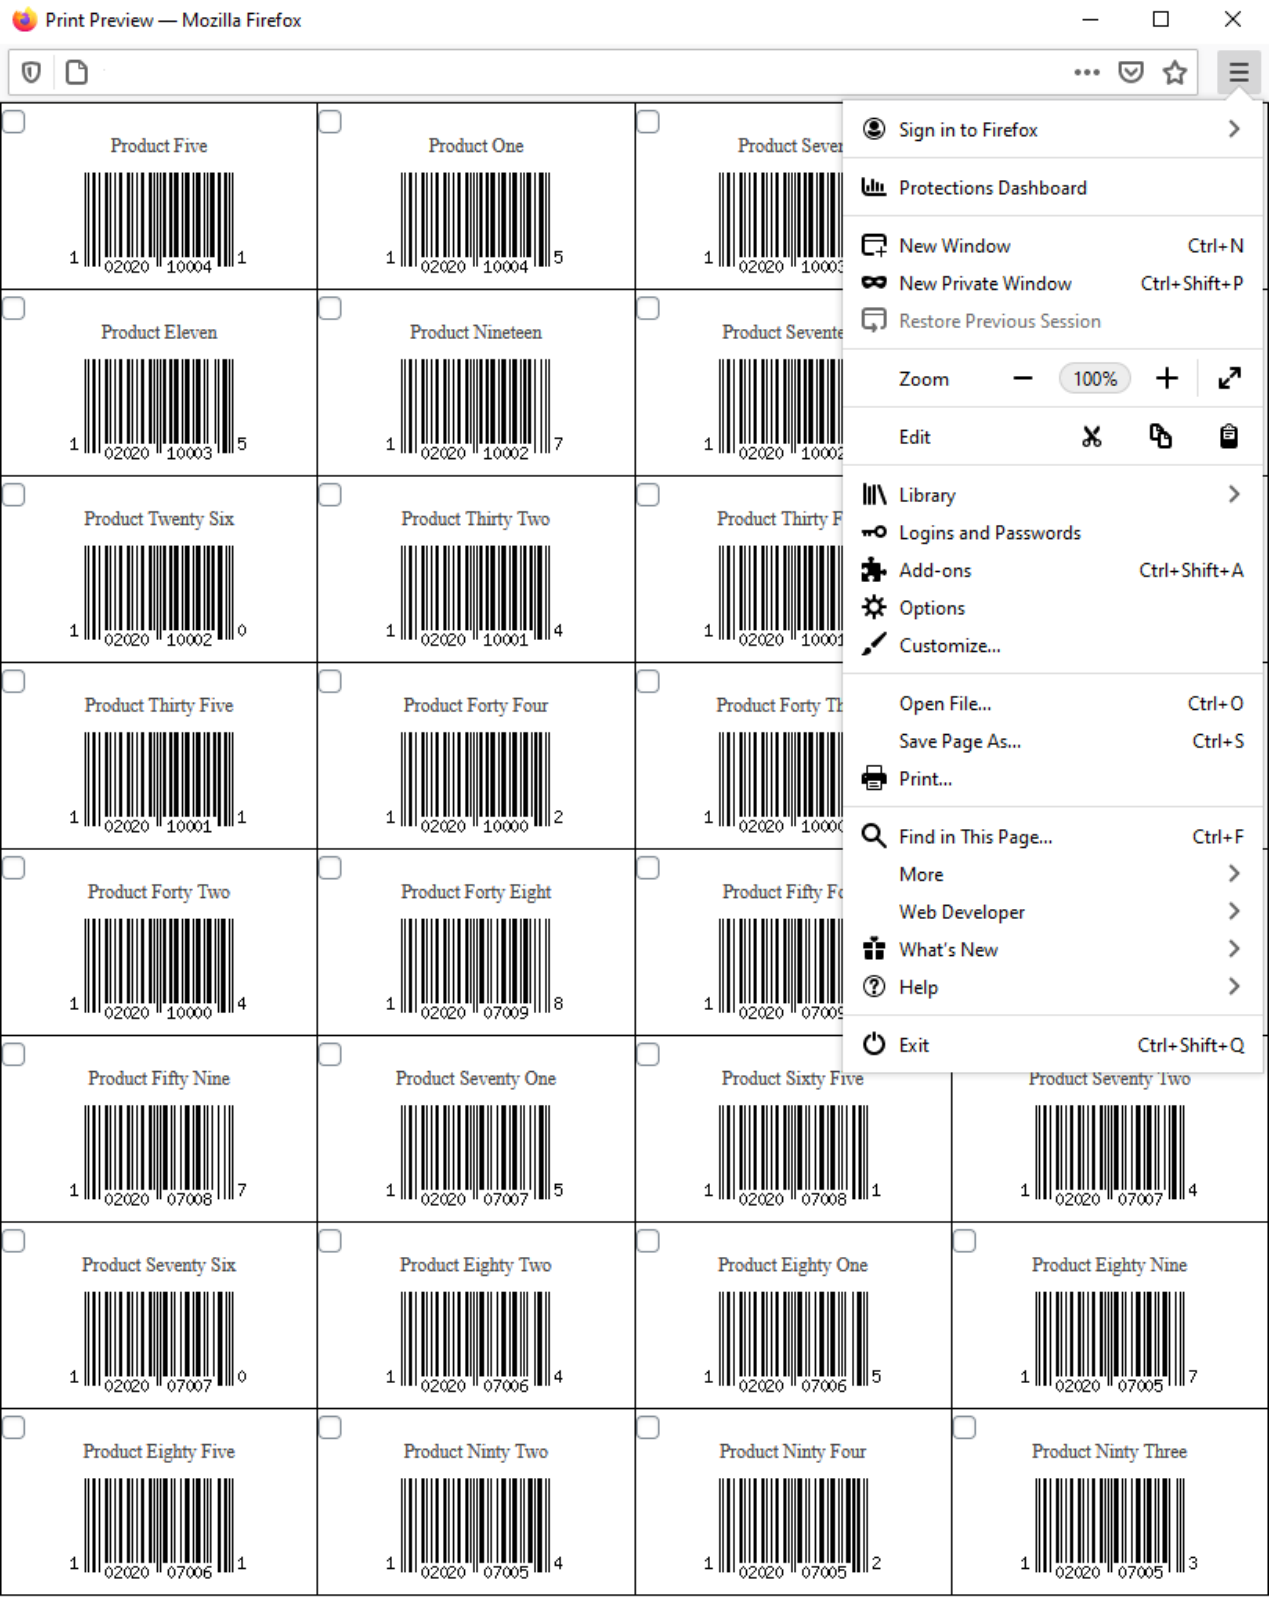

Chrome: 82%

Opera: 86%

Mircosoft Edge: 86%

It is best to print one sheet at a time.

After all the settings are set, then click **Print**.

Remove

☐ Select All Checkboxes

There is also a checkbox on he bottom left corner of each barcode(s) images which you can check the ones you want to keep and delete the ones you don’t need.

The **Select All Checkboxes** will select all of the checkboxes and delete the barcode(s) once you click on the **Remove** button.

This will not affect the products that you have on the website because the barcode(s) are store in another table from the database.

I recommended that you delete the barcode(s) once you print the ones you wanted so you save space on your website.

What labels are used to print out the barcodes?

The **Barcode Letter-Size plugin** used Full-Sheet Labels (the size of a letter 8-1/2" x 11") to print out the barcode(s) and you can use a scissor to cut the barcode(s) individually and then you place the barcode(s) label on the boxes.

You can also use a letter size paper to print out the barcode and cut the barcode(s) individually and use tape to put the barcode(s) labels on the boxes.

These are some of the companies that sell those Full-Sheet Labels:

Uline

<https://www.uline.com/>

Staples

<http://www.staples.com/>

Office Depot

<http://www.officedepot.com/>

Quill

<http://www.quill.com/>

There are some other companies that sell it too, I just name common stores that sell Full-Sheet Labels.

How to used shortcode?

Remove

Copy the short-code and paste it in your post or page. You can also remove unwanted shortcode

What happened if I deactivate the plugin or delete the plugin?

If you deactivate the plugin it will stay on the plugin page and the `woo_bar` table will be still on wordpress database.
But if you delete/remove the plugin it will delete the folders, files and also the tables from the wordpress database.
