How does the barcode letter-size plugin works?

What labels are used to print out the barcodes?

What happened if I deactivate the plugin or delete the plugin?

# How does the barcode letter-size plugin works?

The purpose of the **Barcode Letter-Size** plugin is to create barcode(s) to identify/match your products.

The **Barcode Letter-Size** plugin can display **48** barcode(s) on **Firefox, Chrome** and **Opera** (except **Mircosoft Edge** which display **60** barcodes) per print page.

The size image is 1 for barcodes and the size image is 5 for QR barcodes

When you scan the barcode(s) (**10** designs), the SKU will appear.

Select one codetype: upc-a, ean-13, ean-8, code-39, code-93, ean-128, code-128, itf, qr, dmtx

Select a number size for the barcode image: 1 to 5.

By default the size image is 1 for barcodes and the size image is 5 for QR barcodes.

You can increase the image size for your preference.

There are 2 buttons:

**Generate** button will create the barcodes.

**Reset** button will reset the settings.

Now click **Generate** button.

After you click **Generate** button, it will go to the next page which called **Display Barcode** page where all the barcodes appears:

Version 5.0

When you click on the **Print Preview** button, a pop up window will appear with all the barcodes on it.

When you click on the **Remove** button will remove either 1 barcode or more or all of the barcode(s) from the table from the database.

You can print out **48** barcode(s) on **Firefox**, **Chrome** and **Opera** (except **Mircosoft Edge** which display **60** barcodes) per print page.

The size image is **1** for barcodes and the size image is **5** for QR barcodes

Click on the **Print Preview** button, a pop up window displays the barcodes.

For **Chrome & Opera & Edge** users press on **Ctrl + P** (After you click on the **Print Preview** button).

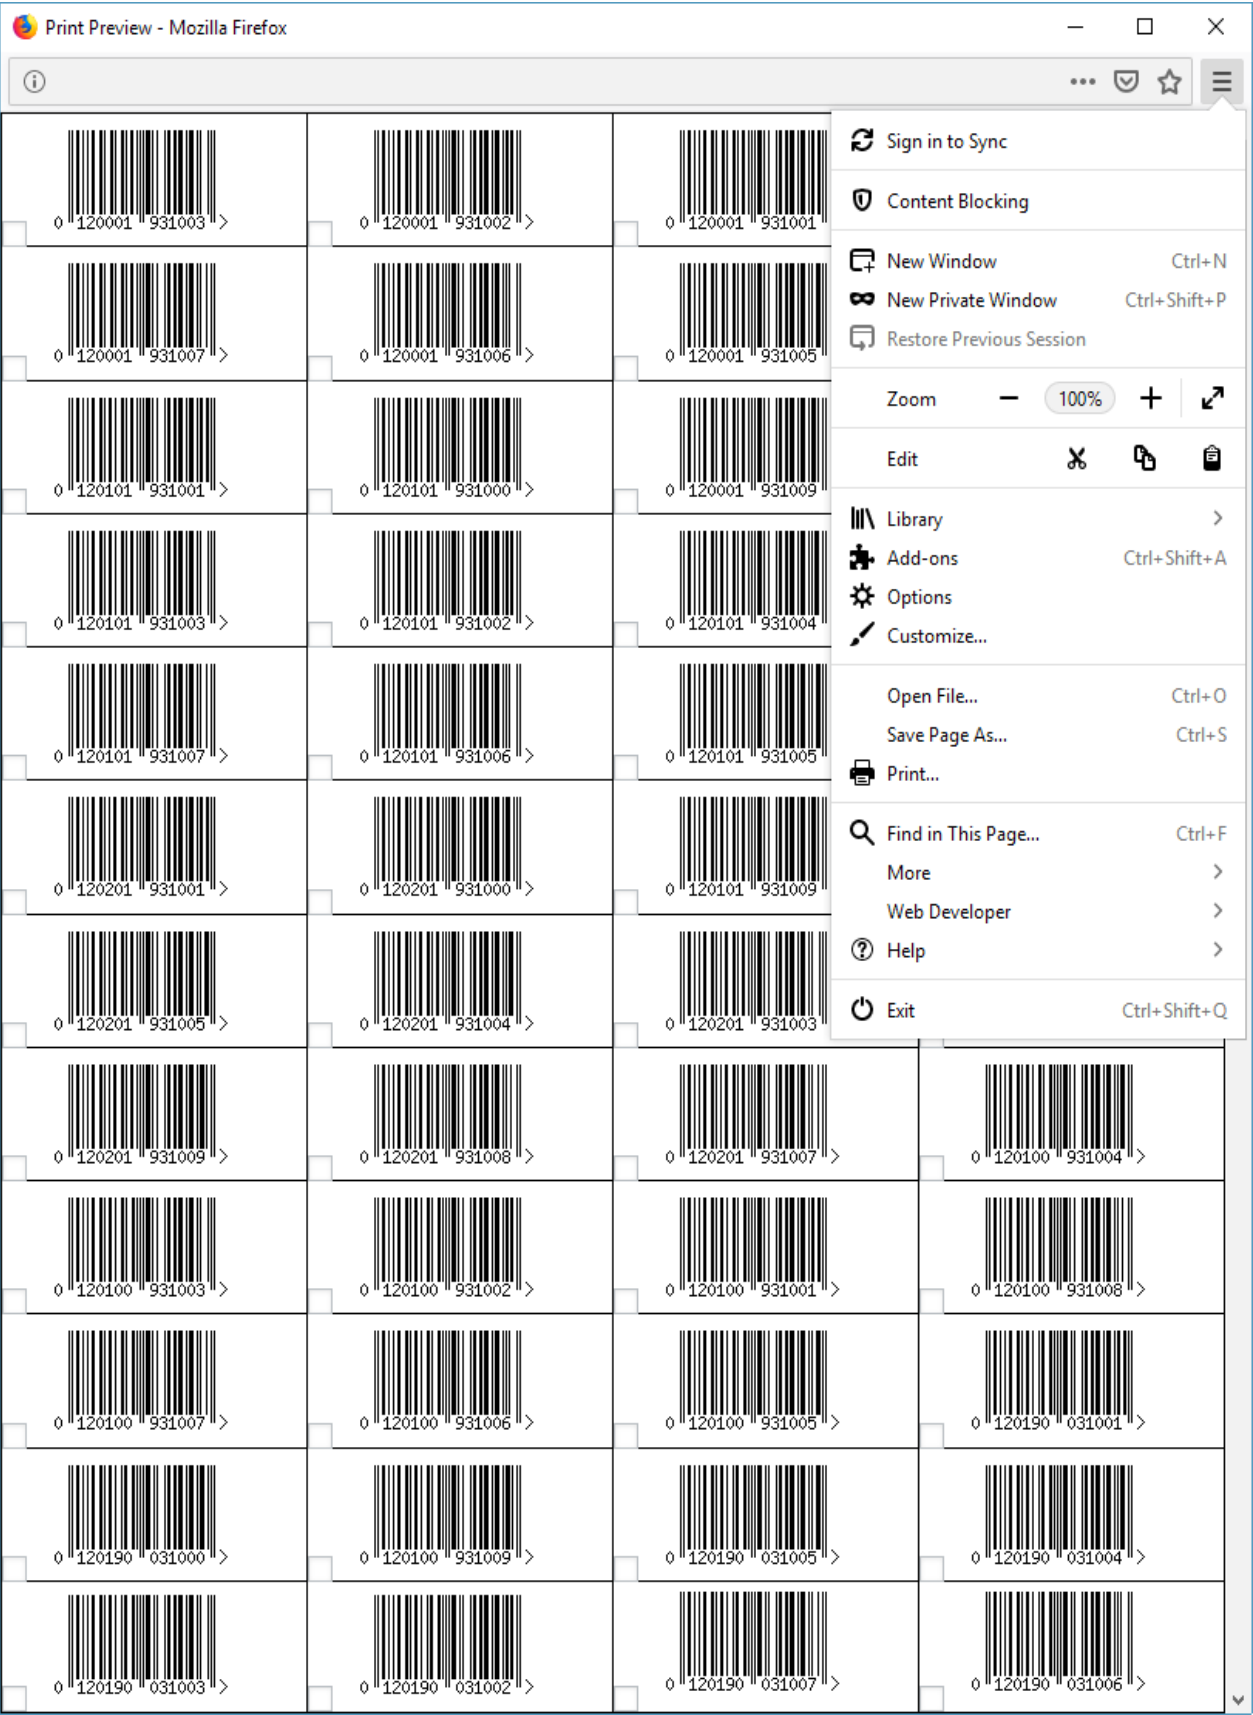

For **Firefox** users just click on  - **Open Menu** and select **Print**.

For all 4 browsers, you have to set **Print Setttings**:

- Layout:** Portrait / Landscape
- Paper size:** Letter
- Scale:** Fit to size / 100% or less
- Margins (inches):** 0.0 (all)
- Header/Footer:** --blank-- (all)

After all the settings are set, then click **Print**.

You can select all pages or select the pages of barcode(s) that you want to print out.

☐ Select All Checkboxes

Thank you for creating with [WordPress](#)

Version 5.0

There is also a checkbox on he bottom left corner of each barcode(s) images which you can check the ones you want to keep and delete the ones you don't need.

The **Select All Checkboxes** will select all of the checkboxes and delete the barcode(s) once you click on the **Remove** button.

This will not affect the products that you have on the website because the barcode(s) are store in another table from the database.

I recommended that you delete the barcode(s) once you print the ones you wanted so you save space on your website.

# What labels are used to print out the barcodes?

The **Barcode Letter-Size plugin** used Full-Sheet Labels (the size of a letter 8-1/2" x 11") to print out the barcode(s) and you can use a scissor to cut the barcode(s) individually and then you place the barcode(s) label on the boxes.

You can also use a letter size paper to print out the barcode and cut the barcode(s) individually and use tape to put the barcode(s) labels on the boxes.

These are some of the companies that sell those Full-Sheet Labels:

Uline

<https://www.uline.com/>

Staples

<http://www.staples.com/>

Office Depot

<http://www.officedepot.com/>

Quill

<http://www.quill.com/>

There are some other companies that sell it too, I just name common stores that sell Full-Sheet Labels.

# What happened if I deactivate the plugin or delete the plugin?

If you deactivate the plugin it will stay on the plugin page and the `woo_bar` table will be still on wordpress database.  
But if you delete/remove the plugin it will delete the folders, files and also the tables from the wordpress database.
